CLAIM

5

1. An agent for preventing and curing arteriosclerosis, having as an active component thereof a chromanol glucoside represented by the following general formula (1)

 $R^{5}O$ R^{1} $R^{5}O$ R^{4} R^{3} R^{4} R^{3} R^{4} R^{3} R^{4} $R^{5}O$ R^{4}

(wherein R^1 , R^2 , R^3 , and R^4 are the same or different and are each a hydrogen atom of a lower alkyl group, R^5 is a hydrogen atom, a lower alkyl group, or a lower acyl group, X is a monosaccharide residue or an oligosaccharide residue optionally having a lower alkyl group or a lower acyl group substitute for the hydrogen atom of the hydroxyl group in the saccharide residue. In is an integer in the range of 0 - 6, and m is an integer in the range of 1 - 6).

- 2. An agent for preventing and curing arteriosclerosis according to claim 1, wherein said chromanol glucoside is 2-(a-D-glucopyranosyl)methyl-2,5,7,8-tetramethylchroman-6-01.
- 3. An agent for preventing and curing arteriosclerosis according to claim 1 or claim 2, wherein said arteriosclerosis is atherosclerosis.
- 4. An agent for preventing and curing arteriosclerosis according to any of claims 1 3, which is an aqueous preparation.
